The new toll system

At the beginning of 2007, the new toll system for heavy goods vehicle traffic of over 3.5 tons has been introduced in France. The new toll system „Télépéage Inter Sociétés Poids Lourds“, called „TIS PL“, is similar to the Telepass system in Italy, and will make it a lot easier to use motorways and to settle tolls.

Technical requirements

The core piece of the electronic toll system is a small device, the **UTA-Box**, which can be installed on the windscreen and which registers all relevant vehicle and transaction data. Consequently specific lanes will be designated for system users:

	For all vehicle classes *
	For all vehicle classes **
	For vehicles with minimum of 3 axles ***

* Vehicle class is assigned **automatically** when passing the toll station
** Vehicle class is assigned **manually** by the toll station personnel
*** Vehicle class 4 is **automatically** assigned

Possible discounts

The TIS PL discounts offered vary from motorway company to motorway company.

The discounts depend on the monthly volumes and, partly, the EURO emission class. They are granted either per vehicle or per vehicle and vehicle fleet.

Do you wish to benefit from all advantages offered by the new electronic toll system in France?

Simply go ahead and order your **UTA-Box**, thus ensuring that you will obtain the discounts offered by different motorway companies.

Enjoy the following advantages by using your UTA-Box

■ Liquidity

Being a UTA customer, you will not need an additional bank guarantee and, in addition, based on attractive terms of payment, extended credit will be a major benefit.

■ Saving money

With UTA you will have the benefit of attractive discounts for motorway toll transactions in France.

■ Saving time

Avoidance of waiting time and traffic jams, by virtue of the electronic toll system.

■ Saving fuel

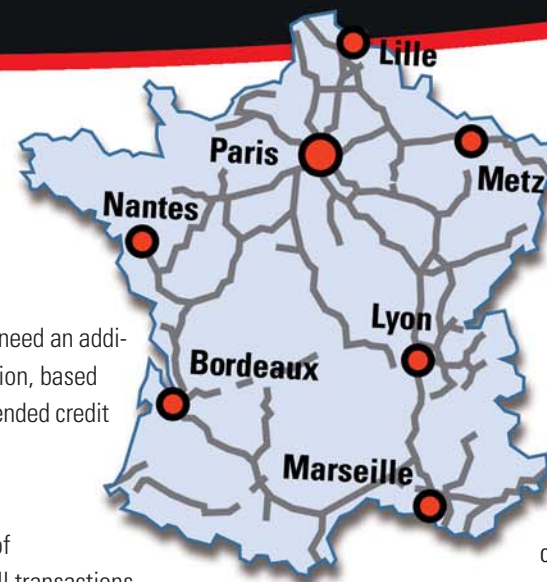

No waiting time at motorway toll stations means saving a lot of fuel and, thus, saving money.

■ Full Service

Settlement of tolls simply and comfortably via UTA. UTA will take care of all administrative tasks for you.

■ Transparency

As usual: one invoice – one invoicing partner. Your toll transaction data will be integrated into your regular UTA invoice, including VAT details. Your vehicle data is shown in your Single Item Verification document and may also be provided electronically for subsequent evaluation by your fleet management by means of **UTA Drive & Save®**.

Changeover from CAPLIS Card to TIS PL

Change to TIS PL now!

Change to TIS PL now, to ensure that you can benefit from interesting discounts on French motorway transactions.

Profit from attractive change-over offers which are offered by different motorway companies.

During 2008 **CAPLIS Cards** will not be accepted. Holders of **CAPLIS Card** may use their cards until they expire.

Even if, so far, you have not used a **CAPLIS Card**, by using the **UTA-Box** you will be well equipped when travelling through France. Decide in favour of UTA – your professional and efficient invoicing partner for tolls – and benefit from our long standing experience in this area.

**For more details,
please contact your UTA subsidiary
or visit www.UTA.com
(section „Toll Service“).**
